

Indoor & Outdoor Professional Lighting 2026

E-volt

Indoor & Outdoor Professional Lighting

E-volt designs and produces professional indoor, outdoor and industrial lighting products. Details like style, proportion, surface, optics and colour temperature are matched to each other across all collections, so it is possible to combine any products with each other. In addition to all these options, you also have completely custom-made solutions at your disposal.

E-volt luminaires meet the highest demands in terms of quality, performance and product life. This takes place in development and test laboratories which, like production and sales, are certified according to the international quality management system DIN EN ISO 9001.

We manufacture high-quality, durable goods and offer a 5-year warranty on the entire product range.
